DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over De Rege Thesauro et al. (US 6,677,266).

US'266 disclose a process for preparation of Ziegler catalyst by containing magnesium chloride with a vanadium compound, and thereafter with a titanium compound selected from $TiX_a(OR)_{4-a}$ (col. 5, line 37 to col. 7, line 65). When X is Cl, a is 2, and R is defined by a phenoxy containing group such as 2,6-di-*t*-butyl-4-methylphenoxy disclosed in lines 52-53 of col. 4, the process disclosed in US'266 meets the limitations of the instant claims.

Therefore, it would have been obvious to a skilled artisan at the time the invention was made to employ the teaching of US'266 to provide to prepare a catalyst composition by using a titanium compound such as bis(2,6-di-*t*-butyl-4-methylphenoxy)titanium dichloride because such is within the generic disclosure of the reference and all of the embodiments of the reference are expected to work and in the absence of any showing of criticality and unexpected results.
